

Topic: Basic Division Concepts.

Object: Begin to understand division as the inverse operation of multiplication and explore division facts related to multiplication tables.

1 Divide 10 into 2 groups circle each group.
Write the number of elements of each group. $10 \div 2 = 5$

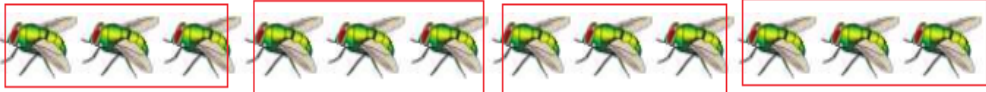

2 Divide 8 into 2 groups circle each group.
Write the number of elements of each group. $8 \div 2 = 4$

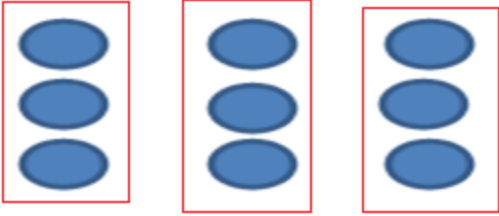

3 Divide 15 into 3 groups circle each group.
Write the number of elements of each group. $15 \div 3 = 5$

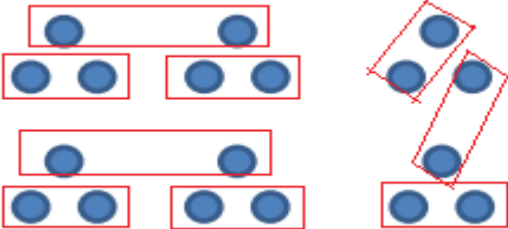

4 Divide 12 into 4 groups circle each group.
Write the number of elements of each group. $12 \div 4 = 3$

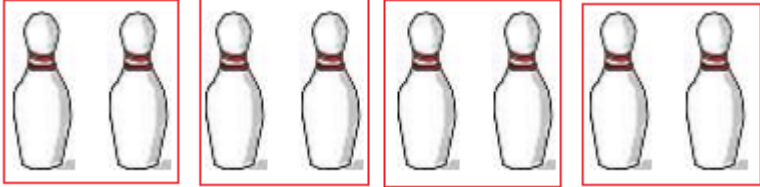

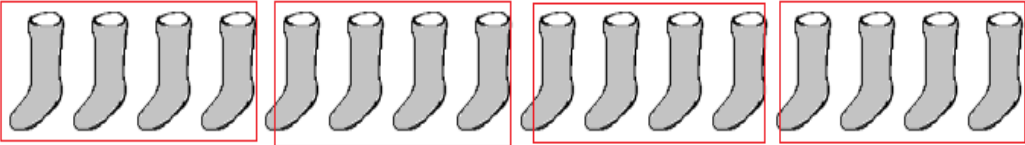

5 Divide 9 into 3 groups circle each group.
Write the number of elements of each group. $9 \div 3 = 3$

6 Divide 18 into 9 groups circle each group.
Write the number of elements of each group. $18 \div 9 = 2$

7	<p>Divide 8 into 4 groups circle each group.</p> <p>Write the number of elements of each group. $8 \div 4 = 2$</p> 
8	<p>Divide 5 into 5 groups circle each group.</p> <p>Write the number of elements of each group. $5 \div 5 = 1$</p> 
9	<p>Divide 16 into 4 groups circle each group.</p> <p>Write the number of elements of each group. $16 \div 4 = 4$</p> 
10	<p>Divide 16 into 2 groups circle each group.</p> <p>Write the number of elements of each group. $16 \div 2 = 8$</p>
