

Topic: Data and Graphs

Object: Collect, organize, and analyze data, including creating and interpreting line plots, line graphs, and bar graphs.

* The following bar graph represents the points scored by 8 teams:

- 1) Which team has the greatest points? **Team H**
- 2) What is the score of the team A? **40**
- 3) How many teams have the same points? **Two teams C and F**
- 4) How many teams have points more than 60? **4**
- 5) What are the average points of the top 3 teams? **100**
- 6) What is the difference of the points between teams E and F? **30**

* The following line plot shows the math scores for Mr. Bill class.

- 1) How many students in the class? 25
- 2) How many students scored less than 8? 7
- 3) How many students got the highest score? 6
- 4) How many fewer students scored 7 than 9? 5
- 5) Which score did the least students get? 2
