

Topic: Geometry

Object: Study geometric concepts such as classifying angles, identifying properties of quadrilaterals, and working with coordinate grids

\* Use the figure to answer the questions:

- 1) Which angle is obtuse?
- 2) Which angle is right?
- 3) Which angle is acute?

- 4) What is the measure of the angle?

\* Identify the shape:

- 5) It has 4 sides, 2 acute angles, 2 obtuse angles and all sides have the same length.
- 6) It has 4 sides, 2 sides are parallel only.
- 7) It has 3 acute angles.
- 8) It has 4 right angles and 4 equal sides
- 9) It has two pairs of parallel sides only.
- 10) It has two pairs of equal sides and 4 right angles.

\* use the grid to draw the missing half of each shape.

Note that each shape should be reflected on its line of symmetry:

11)

12)
